bases for rubber/rubber rolls

## Anilox sleeve

For more than a decade, Pam Rollers Factory has been internally producing its own dedicated line of fiberglass bases for making anilox sleeves, allowing for the control of the entire production process of the various components. In addition to common fiberglass and aluminium bases, at the customer's request we can also supply sleeves with carbon fiber instead of aluminium, with a consistent weight reduction.

We can provide diameters from 47.862 mm (development 170) to 1012.088 mm (development 3200) and a maximum length of 5000 mm.

### APPLICATION

- Flexographics

### DIMENSIONS

- Diameters from 47.862 mm (development 170)
- Diameters from 1012.088 mm (development 3200)
- Maximum length 5000 mm

### MATERIALS

- Carbon fiber + aluminium
- Carbon fiber + carbon
