cliché sleeves

adapters

bases for rubber/rubber rolls

## Central drums

Over the years, Pam Rollers Factory has developed and improved the production of its central drums for flexographic presses, and has become a world leader in the field, supplying the product to major printing machine manufacturers.

Constant investment in research and product development have enabled the company to optimise the production process which meet customers' needs at high-quality standards.

We work up to a maximum diameter of 3800 mm and a length of 5000 mm, with the possibility of applying plasma coating on the surfaces. Our drums achieve significant T.I.R values, with a minimum value of 0.003/0.005 mm.

### APPLICATION

- Flexographics

### DIMENSIONS

- Maximum diameter 3800x5000 mm length
- Maximum length 9500 mm smaller diameter

### MATERIALS

- Steel

### FINISHES

- Chrome plating
- Rubber coating
- Plasma coating
