adapters

bases for rubber/rubber rolls

Adapters

Adapters are holders designed to reduce the difference between the outside diameter of the air mandrel and the internal diameter of the sleeve. Basically, an adapter increases the size of the mandrel without needing to use a sleeve with too high thickness, thus reducing its weight and consequently its cost. The use of high-modulus carbon fiber allows for greater structural rigidity, which results in reduced vibration and consequently better print quality.

APPLICATION

- Flexographics

DIMENSIONS

- Diameter from 47,862 mm (repeat 170)
To max 1012,089 mm (repeat 3200)
- Max length 4500 mm

MATERIALS

- Glassfiber + Aluminium + Carbon Fiber Composite
- Glassfiber + Polyurethane + Carbon Fiber Composite
