Rubber rolls and drums for rubberising

Pam Rollers Factory manufactures rubberising drums and rubber rolls with various types of rubber, available at the customer's specific request. Surfaces can be smooth or spiralled, cross-spiralled or centre-started. These rolls can be made of aluminium, steel or carbon fiber. Available diameter sizes range from 20 mm to 1800 mm, with a maximum turning length of 12000 mm.

APPLICATION

- Flexographics
- Rotogravure
- Others

DIMENSIONS

- Diameters from 20 to 1800 mm
- Grinding length up to 9500 mm
- Turing length up to 12'000 mm

MATERIALS

- Steel
- Aluminium

- Carbon fiber

FINISHES

- Customized rubber application

SURFACE

- Crossed Spirals (1-100 principles - roller engraving)
- Spirals starting from the centre (1-100 principles)
